Education

Hanken School of Economics Doctor of Science - Economics and Business Administration (Finance) CGPA: 4/5	2025–2029
Hanken School of Economics MSc in Finance, GBSN Premium Scholarship CGPA: 4.5/5	2023–2025
Institute of Business Administration, Karachi BS in Accounting and Finance CGPA: 3.84/4	2019–2023

Research Profile

Dissertation Area: Corporate Finance, Financial Risk, Debt Financing and Corporate Disclosures

My doctoral research examines corporate financial risk and financing decisions, with particular interest in how information contained in corporate disclosures can help explain firms’ financial conditions and risk exposures. My work combines large-scale financial datasets with textual analysis, natural language processing and machine-learning methods.

Research Interests: Corporate Finance, Financial Risk, Debt Markets, Corporate Disclosures, Empirical Finance
Methods: Econometrics, Textual Analysis, Natural Language Processing, Machine Learning, Large-Scale Financial Data

Research Experience

Doctoral Researcher in Finance <i>Hanken School of Economics, Helsinki, Finland</i>	Aug 2025–Present
- Conduct doctoral research in empirical corporate finance, focusing broadly on corporate financial risk, debt financing and information contained in corporate disclosures. - Work with large-scale financial and textual datasets using econometric, natural language processing and machine-learning methods.	
Master’s Thesis – Impact of ESG Factors on Financial Returns: A U.S. Industry Analysis <i>Hanken School of Economics</i>	Sep 2024–Feb 2025
- Examined the relationship between ESG factors and financial performance across U.S. industries using portfolio analysis in R. - Combined MSCI and LSEG data to compare industries with different levels of ESG relevance and examine differences in financial outcomes.	
Research Assistant <i>Institute of Business Administration, Karachi</i>	Dec 2022–Jun 2023
- Studied how institutional investors in Pakistan understand and incorporate Environmental, Social and Governance (ESG) factors into investment decisions. - Conducted 10 in-depth interviews, distributed 200 questionnaires and performed statistical analysis of the resulting data.	
Research Project – Oil Hedging and Financial Risk <i>Pakistan State Oil</i>	Jul 2022–Sep 2022

- Examined the economic viability of oil-price hedging for Pakistan and the use of forward contracts to manage exposure to oil-price movements.
- Analysed forward-contract strategies and presented the findings in a 30-page research report to management.

Teaching Experience

Teaching Assistant, Department of Finance

Aug 2021–May 2023

Institute of Business Administration, Karachi

- Supported undergraduate teaching in **Financial Management** and **Introduction to Business Finance**.
- Worked with faculty on course materials, tutorials and Excel-based exercises designed to make core finance concepts more applied and accessible.

Associate Teacher

Sep 2020–Dec 2020

Foundation Public School A Level

- Taught and mentored A-Level students in Economics and Accounting in an online learning environment.
- Used interactive tools including Canva and Zoom to support remote teaching and student engagement.

Research Projects

Master's Thesis: Impact of ESG Factors on Financial Returns: A U.S. Industry Analysis Sep 2024–Feb 2025

- Examined the relationship between ESG relevance and financial performance across U.S. industries using portfolio analysis in R.
- Combined MSCI and LSEG data to compare industries with relatively high and low ESG relevance and identify differences in financial outcomes.

Financial Analysis and Machine Learning Using R

Jan 2024–May 2024

- Applied R to problems in quantitative finance and credit risk, including the Black–Scholes–Merton framework, Ito's Lemma and Value at Risk.
- Developed and evaluated quantitative models while gaining practical experience with machine-learning methods in financial applications.

Data Analysis with Python and SQL

Sep 2023–Nov 2023

- Used Python, pandas and PostgreSQL for data preparation, analysis and database work.
- Worked with textual data, web scraping, web services and introductory machine-learning applications.

Research Funding & Awards

Doctoral Research Grant – Foundation for the Advancement of Finnish Securities Markets 2026–2027

- Awarded a competitive EUR 14,500 grant to support doctoral research in Finance during the 2026–2027 academic year.

Nordic Finance Network – Course Grant

2026
